

FieldMate

Laser Power Meter

This latest member of Coherent's power meter line-up combines both a steady digital display and fast analog meter to provide the most economical way to make power measurements. These small, rugged power meters are ideal for use in the field, and the analog output (0 to 2V) facilitates external power analysis on the manufacturing floor, while retaining a simple-to-use user interface.

FieldMate™ improves upon a familiar method of peaking and tweaking laser power output – the analog needle. With faster electronics and a sophisticated digital processing algorithm, the FieldMate's analog needle responds faster than older meters, enabling rapid, sensitive laser adjustment.

FieldMate is compatible with all PowerMax thermal sensors and a variety of optical sensors, allowing its use with lasers from the ultraviolet to the infrared, from nW to kW. Built-in wavelength compensation ensures that readings at any wavelength will remain accurate. LM-model thermopiles and optical sensors are compatible via an optional SmartSensor adapter (item number 1056827).

The meter is powered from standard 9V batteries (available worldwide) and includes a battery eliminator power supply.
